**J. Reading Comprehension:** Read the following passage and answer the questions as required.

Mechanized farming means the use of modern machinery on farms. On many modern farms the work of laborers is done by up – to – date machines. The use of these machines helps to have a lot of time and labor and brings in big profits. For instance, in modern orchards even the picking of fruit is done by machinery. A tractor with a long metal arm drives up to a tree, fastens its fingers firmly round one of the branches and begins to shake it vigorously. As the ripe fruit drops, it is caught by a special device, then it is sent along a conveyor belt and packed into large wooden boxes. Only three men are needed to work this tractor, but they can pick about thirty tons of fruits in one day. When the picked fruit is unloaded, it is cleaned, sorted and packed by machinery. So, when the ripe fruit is bought by a housewife, it is really untouched by human hands.

**Questions:**

**32. What happens as the ripe fruit drops?**

**33. Picked fruit is sorted by a housewife on a modern farm.**

*True / False / Not mentioned*
